RETRACTORS AND BALANCERS

Manufactured to the highest quality standards

Kromer Spring Retractors and Balancers are characterized by their durability and exceptional precision. They are manufactured to the highest quality standards, are long-term tested and a prime example of the quality term "Made in Germany". In many industries, they are already used to improve working conditions and support smooth processes.

Kromer ESD Balancers have been specifically designed for the production and assembly of electronic components. They are made exclusively from conductive materials and have got an integrated grounding connection to prevent electrostatic discharges.

ESD Balancers keep ESD assembly tools and other accessories, such as soldering irons, readily available for the user, ensuring a well-structured, secure, and ergonomic work environment. By neutralizing the weight of assembly tools, the Kromer ESD Balancer enables the user to work with precision and without premature performance degradation.

Your most important advantages at a glance:

POWER
Reliability and longevity of the products guarantee a steady and high performance.

SAFETY
More security through constant inspection checks. Safe handling of the products.

PRECISION
Specially designed for very sensitive work. Ensures high precision in daily work.

ESD DESIGN
Rust-free materials and integrated gound connection to avoid static discharges.

QUALITY
Manufactured to the highest quality standards. A true worldwide quality leader.

MADE IN GERMANY
Exemplary example of the value concept "Made in Germany". Quality thinking is always in the focus.

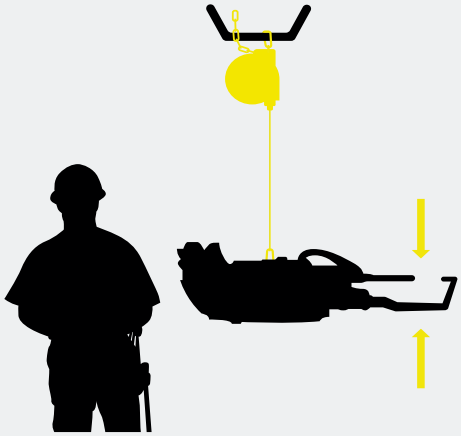
SERVICE
Highest service level before and after purchase. Fast spare parts delivery and maintenance of the products.

PRODUCT FUNCTION

Less strain, more performance – the smart way to work

ESD balancers are essential tools for improving ergonomics, safety, and efficiency in environments sensitive to electrostatic discharge. They support operators by balancing the weight of tools and components while preventing the buildup of static electricity. This not only reduces physical strain and operator fatigue but also protects sensitive electronic equipment and minimizes the risk of costly damage.

Function of ESD Balancers:



Kromer ESD Balancers keep loads suspended reliably and safely at any height.

- Conical shape
- Constant retraction force
- Holds the attached load in the chosen position

Designed according to the highest safety standards

KROMER GMBH

Over 100 years of Know-How

Kromer is located in Gottenheim, near Freiburg im Breisgau, Germany. We belong to the internationally leading manufacturers in the area of Retractors and Balancers. With more than 100 years of know-how, we supply high-quality products and customized spring balancer solutions to our customers.

In 2000, we became part of the global acting and family owned Carl Stahl Group. The history of Kromer reaches back to the 19th century – in the long process of establishing ourselves, we gained great knowledge and experience.

Today, our great expertise is reflected in the outstanding quality of our premium products "Made in Germany". Furthermore, the most important goal of our company is achieving the greatest level of customer satisfaction.

KROMER

A safe decision. In every respect.

Top quality and cutting-edge technology

All Kromer products are manufactured at our location in southwest Germany, where they are subjected to daily analysis and optimization. Quick, smooth manufacturing processes, cutting-edge machines, and constant, careful quality checks by our motivated staff ensure that each final product is of outstanding quality. Thus Kromer is of course certified according to the international standard of quality management ISO 9001:2015.

Modern work environment and sustainability

An optimized and modern work environment at Kromer ensures consistently high product quality. That's why we maintain state-of-the-art operations – from our production facilities and office equipment to the well-being of our employees. Environmental protection and sustainability are equally important to us. Kromer is certified according to the ISO 14001:2015 environmental standard and is also a CO2 neutral company.

Comprehensive services

The most important goal of our company is achieving the greatest level of customer satisfaction. That is why we offer services that go beyond our product range. Competent, personal consulting and comprehensive answers to all questions are provided as a matter of course. We are also happy to work closely with our customers to develop precisely tailored solutions. Unique training services are provided in our Carl Stahl Academy in Suessen, Germany. Also in-house courses on site are available upon request.

SPARE PARTS
Original Kromer spare parts ensure a long lifetime of the products and smooth work flow in the production.

MAINTENANCE & REPAIR
If needed, our specialists are pleased to take care of the maintenance and repair. Convenient, fast and reliable.

PRODUCT TRAININGS
Get your certification as qualified technician with our special trainings. Prevent costs and down time in your production.

Your benefits

- Rust-free materials
  - Stainless steel
  - Aluminum
  - Synthetic
- Integrated ground connection
- Easy mainteance & repairs
- Long-life cycle
- High degree of accuracy
- Highest safety standards
- Quality Made in Germany
